## DESCRIPTION & KEY BENEFITS

Granitex chip flooring is a composition of multi-colored vinyl chips embedded in a pigmented base coat and sealed with successive coats of clear glaze. You may choose from a variety of colors and chip sizes to get the look that you desire. For example, larger chips create the look of terrazzo or granite, while smaller chips give a hard surface carpet appearance. In addition to these customizable options, our Granitex systems offer proven durability and longevity for a multitude of applications.

## COMMON APPLICATIONS:

- Garage floors
- Driveways
- Clean rooms
- Laboratories
- Offices
- Restaurant Interiors
- Retail establishments
- Showrooms
