

SUBJECT: PRODUCT UPDATE APF POLYURETHANE 501

EFFECTIVE DATE: October 23, 2019

ICP Arizona Polymers is pleased to announce a significant formulation change and product improvement to **APF POLYURETHANE 501**

Changes and improvements to the formulation were made to:

- Correct product quality issues.
- Improve overall uniformity of applied, cured product.
- Improve workability, roll-out and finish.
- Now available in **Regular Gloss, Satin and Matte finishes.**

COLORS: The new product will be available in clear and six standard colors:

White
Black
Delta Fog
Sterling
Wheat
Thatch Brown

UVR Additive is available under separate SKU.

All production from this date is the new formulation.

INVENTORY: Any existing inventory should not be sold. Please advise your customer service personnel to inform purchasers of this change at the time of purchase. Contractors, please advise your field personnel immediately.

COMBINING PRODUCT: Do not mix old version product with the new version. Old version product (manufactured prior to May 2019) should not be used at all.

LOOK & FEEL: Your customers, contractors, and applicators will notice a positive change in appearance, workability, and performance of the product. Your customers may continue to have the utmost confidence in the ultimate performance of the product.

Coverage, yield and consumption rates are not changed with the improved formula. Application techniques and methods remain unchanged.

PRODUCT DATA SHEETS: Updated Product Data Sheets can be found by visiting www.apfepoxy.com.

SAFETY DATA SHEETS: Updated Safety Data Sheets can be found by visiting www.apfepoxy.com.

LABELS: All new production will have the addition of the part numbers listed on the front panel of each label. Remove any old material from inventory.

See new component SKU's on next page.
